

Dear Elaine and Olive

I am writing to wish all mesh survivors a merry Christmas and a Happy New Year.

A lot was achieved in 2021 by our campaign for the rights of the women who have been the victims of botched mesh procedures, including the future and retrospective funding of mesh removal.

I am sure that 2022 will see further progress with an increasing number of women benefitting from access to mesh removal procedures to be undertaken by their chosen doctors

None of this would have been possible without the dedicated and persistent campaigning by all the women who sacrificed so much.

All the best for the future. You all deserve it.

Alex Neil
